## **Saturn's rings**

### **Student Worksheet ...**

- What are Saturn's rings made of?
- How many rings are there?
- What caused the rings to form?

### **Something else to think about...**

Scientists are now finding lots of water in outer space. For instance, many comets are full of ice, like giant snowballs. And scientists now suspect there may be a saltwater ocean inside one of the moons of Jupiter. (Inside one of Jupiter's large moons, called Europa.)
